

Rogue Valley Metaphysical Library presents

Andrew D. Basiago

Project Pegasus and the Advent of Time Travel

Following hundreds of lectures in Ashland over the past 16 years, RVML now presents our most controversial speaker.

Andrew D. Basiago is a leading figure in the Truth Movement, best known for revealing publicly his life experiences as one of America's first time-space explorers and Mars visitors.

Andy is a lawyer, writer, public speaker, media personality, former US "chrononaut," and 21st century visionary.

He is a member of the Washington State Bar Association and the United States District Court for the Western District of Washington and maintains an active law practice in Washington.

He holds five degrees, including a Bachelor of Arts in History from UCLA, a Juris Doctor from Lewis & Clark, and a Master of Philosophy (*Cantab*) from the University of Cambridge.

For more than a decade, Andy has waged a "Truth Campaign" in which he has told the true story of America's achievements in time travel and Mars visitation. He has done so as one who served bravely in the two secret US defense projects in which time travel and voyages to Mars were first undertaken, DARPA's Project Pegasus and the CIA's Mars jump room program.

In that capacity, Andy was the first American child to Tesla teleport and the US chrononaut who later gave a true account of the early days of time-space travel by the US government.

To get the truth out, he has given 50 major public talks about his time travel experiences and exploits in the American secret space program to audiences throughout the world.

Andy is a popular guest on talk radio's *Coast to Coast AM* and has appeared on TruTV's *Conspiracy Theory* with Jesse Ventura, The History Channel's *Weird or What?* with William Shatner, and more than 100 other television and radio shows produced in the United States, Argentina, Australia, Britain, Canada, Ireland, Israel, Mexico, New Zealand, and Sweden.

His *The Discovery of Life on Mars* [2008] was the first paper to prove that Mars is inhabited and the first written work to include images of humanoid beings and animals on another planet. He is the creator of the Facebook groups Project Pegasus and Mars Anomaly Research Society. YouTubes about his time travel and Mars experiences regularly attain more than 1 million hits.

Did the Los Alamos physicists that built the bomb achieve time travel by 1970, as Andy claims, or is he a futurist provocateur indicating the direction that applied quantum physics could take? We invite yo to attend these provocative lectures and decide fact from science fiction fantasy.

Friday, January 5, 2018, 7:00 pm-9:00 pm
The True Story of an American Time Traveler
\$20.00 at the door , seating limited to 50

Saturday, January 6, 2018, 10:00 am-4:00 pm
Destination Mars: an All-Day Intensive
\$40.00 at the door , seating limited to 50

These will be deep dive, multi-media presentations with opportunity for Q&A after each talk.

Hidden Springs Wellness Center
1651 Siskiyou Blvd., Ashland, OR

Behind Ashland Street Cinemas. Near healthy restaurants for lunch break on Saturday.
